

YOUR SUSTAINABLE LIFESTYLE STARTS WITH

Spring / Summer Collection 2023
Sustainable interior since 2009

A photograph of a forest floor covered in brown, fallen leaves. Several small green plants are growing through the leaf litter. In the background, the trunks of trees and more green foliage are visible, slightly out of focus.

**For us sustainability is not a trend,
it is a lifestyle**

Lübech Living - since 2009

OUR CAREFULLY SELECTED MATERIALS

Lübech Living only work with a few suppliers as we prioritize a very close collaboration with each of them. This way we can follow the process closely and make sure that our products are produced under good social conditions and in an eco-friendly way.

1

Zero Waste Paper

Made of excess paper from our own production.

2

100% Recycled Paper

Which we turn into new handmade designs.

3

Hand Poured Certified Candles

Asthma and allergy friendly candles tested free for cancerous particles when burning. Made from 100% refined food grade paraffin.

4

100% Recycled Glass

Mouthblown and handmade.

5

Natural Cork

Made of cork from Cork Oak trees. A 100% natural, biodegradable, antibacterial, renewable, recyclable and CO2 friendly material.

6

Handmade Ceramics

produced using solar energy and water recycling.

7

Recycled Plastic

Made from used plastic bottles / plastic bags and turned into Danish Design.

8

Leftovers from the Textile Industry

There is a massive over production of labels globally. We turn the excess labels into new designs.

9

Zero Waste Wool

A new collection made of excess wool from the glerups shoe production.

Care for Tomorrow - Shape the Future!

*"We had a dream
and a mission as
early as 2009"*
- Søren & Susanne Lübech

Lübech Living was founded in 2006. We work within the business of interior, lifestyle and home decoration. Back in 2009 we turned our full attention on sustainability. Lübech Living design and produce our own brand OOhh and OOhhx. We work as the European distributor for Vance Kitira Candles and we are the Nordic distributor for the well known italian brand UASHMAMA.

The OOhh Collection is a unique combination of stylish and timeless Danish design produced with the use of special selected sustainable materials.

OOhhx is a unique collection in the OOhh range which is designed and produced from the same values as our OOhh Collection. We produce in countries as Sri Lanka, Vietnam and Europe. Common for our products is that they are all handmade, developed from sustainable materials and part of a sustainable production. And of course always with that extra OOhh detail.

Our customers are always our first priority.

Carefully Created Collections

OOhh OOhhx Vance Kitira

With Love

Søren & Susanne Lübech

Sustainable design since 2009

Care for tomorrow - shape the future!

Lübech Living is considered a strong role model in the sustainable interior industry having focused on sustainability since 2009.

We enjoy designing and creating beautiful decor from sustainable materials!

Since 2010 OOhh products has been made in Sri Lanka by strong and proud women working from home earning an important extra income for their family. We are privileged to be part of this project and to witness a positive change in their local area.

Social responsibility

We use the power of the sun to dry our paper products

Made by hand

All our products are made by hand and therefore unique.

SUSTAINABLE FACTS

The OOhh products are handmade and therefore all unique. As a result colors and sizes may differ slightly from the text and photos.

All our paper pots are biodegradable

We turn our own excess paper into new paper.

Natural latex is used to waterproof our pots.

We dry our paper & paper pots in the sunlight.

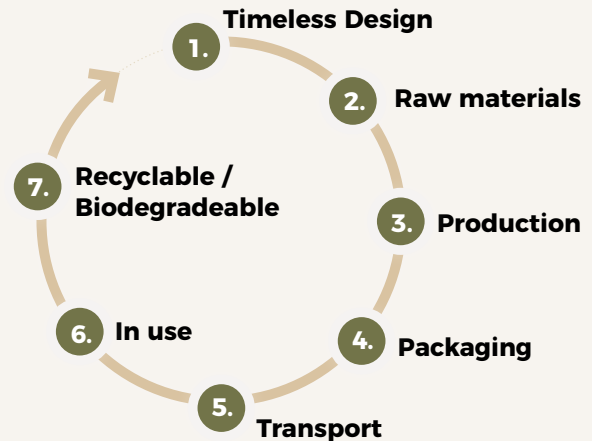

We work with less privileged women in Sri Lanka.

To reduce our CO2 footprint we nest our paper pots

A FULL CIRCLE OF SUSTAINABLE THINKING

We consider our CO2 footprint in every step from design, to raw materials, production packaging and all the way to its eco-friendly reuse and disposal.

We create products which can be ecofriendly disposed after use.

HOW IS OUR PACKAGING SUSTAINABLE?

1. Optimized packaging: Eco-nested

Since 2020 several of the OOHH pots are nested. For products with an Eco-nested symbol every second pot will be slightly wider so we are able to nest two pots of same height in order to help reduce our CO2 footprint. Let's go green together.

2. Recycled packaging boxes

We reuse recycled paper when producing our cardboard boxes for our collections.

3. Your order is shipped in reused boxes

Instead of throwing out cardboard boxes we always reuse boxes from our suppliers and other businesses in our area to ship out your order. We hope you will treat the waste with care. If you receive any plastic filling please note that it is 100% waste material from other businesses in our area. We only use waste collected plastic.

4. Recycled box filling

The boxes that are too weak to be used for re-packing we shred and turn into box fillers, which will ensure that your goods arrive safely.

*From waste paper to
new handmade paper*

1 Zero Waste Paper

@oohh_collection

Made waterproof with natural latex

This is why we create paper from our own cut offs

In 2018 we realized that despite being a sustainable company our production took part in creating 20 tons of paper waster per year. This enticed us to look into new possibilities of re-using our own cut offs.

The result was a new generation of sustainable paper, which we named Zero Waste paper. The softness of the paper is ideal when creating structures and patterns, and we are proud to expand the collection with new designs in the SS23 collection.

100% recycled paper

2 ^{100%} Recycled paper

@oohh_collection

Biodegradable

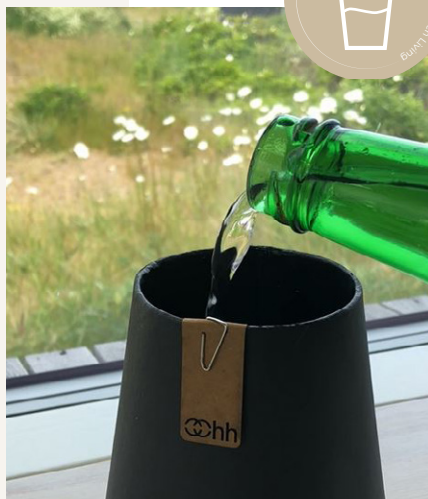

This is why we use recycled paper

Recycled paper has followed OOHH since 2010. The first OOHH flowerpot was made from recycled paper, and we are still a major fan of the possibility to create stunning decor from such a strong sustainable and biodegradable material.

Recycled paper offers us an interesting base to develop timeless flowerpots and interior, and since we always add that extra 'OOHH' detail you will receive a unique piece of sustainable handcraft.

The sense of the **sustainable lifestyle** already began in the **childhood home**

Small communities showing creativity with their resources

As part of a dance company Susanne and Søren started travelling together as teenagers to destinations in Asia and Africa. Here they quickly discovered how small communities get the maximum out of the limited resources they have available. The use of recycled materials and the craftsmanship of the artisans fascinated them. When returning home they unfortunately also realized that the beautiful products they purchased did not fit into the Scandinavian interior style.

Sustainability and design must go hand in hand

Back in 2009, when Susanne and Søren decided to focus purely on sustainability and social responsibility they knew that they had to make beautiful Scandinavian designs to make it a success. Sustainability was not a valued asset at that time. Therefore they decided to show the world that sustainability and social responsibility can be united in beautiful design.

**“For us sustainability is not a trend,
it is a lifestyle”**

Why sustainability as early as 2009?

Because it made sense. After years of working and doing business in Asia, Susanne was eager to get away from the industrial business standards in Asia. Susanne wanted to work with something more meaningful matching her personal values.

Pure happiness shines from Susanne's eyes when she looks back at everyday life in her childhood home. This is where she was inspired to get the maximum out of all resources and taught to share all of your leftover materials with others. She clearly remembers how the neighborhood came to the garage of the family home to pick up single bolts, nails and pieces of wooden boards. Her father always saved these thinking that every household should not have to buy a full box when only a few was needed.

FOLLOW LÜBECH LIVING'S SUSTAINABLE JOURNEY

It all started in Sri Lanka with a man saying "I know your candles and I know you care about the environment. I can make recycled paper waterproof". That was the beginning of a lovely collaboration with our Fair Trade project in Sri Lanka.

2010

We launched the first OOhh Recycled Paper Pots with sand finish made by less privileged women in Sri Lanka.

2009

Actually it was not in 2010. Vance Kitira already gave us inspiration for sustainable thinking in 2009.

2012

Lübech Living were nominated for the Formland Design Award with the innovative OOhh creased paper pot on wooden base.

2018

We launched the first OOhh recycled glass collection.

2015

We decided to start a new womens project in Vietnam in line with our Sri Lanka womens project. Resulting in the introduction of the OOhh weaved basket collection.

2013

We introduced the popular OOhh Eco-Felt made from recycled plastic.

2018

We developed the unique OOhh Zero Waste paper. Made of leftover paper from our own production.

2019

We designed our first sustainable ceramic collection produced using solar energy and water recycling.

2021

We have entered a new collaboration with glerups on their wool waste material.

2022

After years of considering and researching we introduce the cork material in 2022. We have now had the time to study the cork material and get to know its sustainable profile.

2023

Mail Me by OOhh. With this new flat packed flower pot we are able to cut down our CO2 footprint and take sustainability in the flower industry to a new level.

We can't wait to see where sustainability will take us next!

OUR RETAILERS SAYS:

“Customers who start using Vance Kitira candles always come back for more. I have my regular customers who buy the candles because of asthma in the family.”

- Balsalen, Århus

“

My customers really like the story but especially the colors, long burn hours and the fact that they are allergy friendly are of great importance to them.”

- Blomstertanken, Gilleleje

Easter Time is Candle time

Certified Clean Candles

Why not do like many of our loyal retailers and create a great collection of pure clean candles for Easter. The vibrant Vance Kitira colors bring out that special Easter and Spring feeling to be enjoyed with the family in a clean indoor environment.

Celebrate Life, Light a Candle - Vance Kitira

#vancekitera europe

This is why we use foodgrade paraffin

We use a fully-refined food-grade paraffin wax which has been hydro treated to remove all impurities. The result is a wax that is water clear, odorless and smokeless during burning.

The wax is REACH certified and our candles are certified free of any cause of cancer leading particles as well as we have a sooting test procent as low as 0,01% , which is the lowest possible in the market.

“As a brand we have seen our image stronger under Lübech Living marketing and distribution.”

- Vance Kitira

4 Natural Cork

@oohh_collection

This is why we use cork

Cork is in the absolute top of the scale as a persistent, reusable and compostable material.

No trees are harmed in the harvesting of cork

Cork is a 100% natural material

Cork is biodegradable

Cork is renewable

Cork is recyclable

A multifunctional Cork Collection

/ 100% natural cork

The OOhh cork collection is designed to be used in multiple ways. Use it by itself or in combination with many of the other OOhh and Vance Kitira products.

5 @oohh_collection Ceramic

Sustainably produced using solar energy and water reuse

This is why we chose to introduce ceramics

After we were contacted by the supplier we use today we decided to introduce ceramics. With this we wish to show the industry that it is possible to produce ceramics in a more sustainable way than the current industry standards,

Our supplier is ISO certified and they use their own solar energy to run the production as well as the water reusing system they have installed. All products are handmade. The result is a range of beautifully designed ceramic products providing new possibilities which the paper do not offer.

Handmade / Mouthblown

3 100% Recycled Glass

@oohh_collection

This is why we use recycled glass

The first addition to the OOhhx collection was the range of beautiful mouth blown recycled glass specially selected from a renowned European glass factory.

OOhhx only use 100% recycled glass as it provides big environmental payoffs. It reduces CO2, saving energy - about 30% less energy is required to melt cullet compared to virgin raw material. Glass can be recycled endlessly with no loss in quality or purity. A perfect example of sustainability.

EVERY SUPPLIER IS CAREFULLY SELECTED

We carefully select suppliers who always strive to be even more sustainable tomorrow than they are today. That's why it is a pleasure to have a close collaboration with our European suppliers of the OOHx glass.

Natural material

9 Zero Waste Wool

@oohh_collection

Why we use zero waste wool?

In this case we have a fantastic opportunity to use the waste wool from the glerups shoe production. glerups shoes are known for their very high quality of wool which allow us to design the most beautiful wool products. Furthermore a wish of having a local zero waste cooperation came through with this project.

But why is the glerups wool an attractive sustainable material to us?

Because it is a 100% pure natural material, antibacterial, 100% biodegradable and has the fantastic qualities of being stain resistant, itch-free and temperature regulating - so it can keep both your coffee warm and your wine cold.

Outdoor Friendly

Zero Waste Wool Collection

/ Waste wool from glerups production / Outdoor friendly

Susanne Lübeck, OOHH / Allan Timm, glerups

OOhh & glerups
Our passion is felt

A cooperation between OOHH & glerups

The dream came true for Lübeck Living when we together with the danish company glerups started our Zero Waste wool project. In this project we reuse excess wool from the glerups production for our lovely Nordic inspired designs.
